EDUCATION

Cochin University of Science and Technology

Electronics and Instrumentation B.Tech

CGPA: 7.1

Kochi, Kerala

September 2012 - April 2016

SVGVHSS, Kidangannur

Degree in Higher Secondary

Percentage: 80%

Pathanamthitta, Kerala

June 2010 - March 2012

EXPERIENCE

Resmed India | Software Engineer

Thiruvananthapuram, India | May 2025 - Present

- Designed and implemented serverless microservices using AWS Lambda, API Gateway, DynamoDB, SQS, SNS, and S3, ensuring high scalability and cost efficiency.
- Managed secure configurations with AWS KMS, Secrets Manager, and IAM policies for data protection and access control.
- Automated infrastructure provisioning and deployments using AWS CloudFormation, SAM templates, and GitHub Actions CI/CD pipelines.
- Developed and maintained backend APIs using LoopBack 4 and Spring Boot, adhering to OpenAPI specifications and best coding practices.
- Integrated AI-powered features into existing platforms, enhancing system intelligence and personalized user experiences.
- Collaborated with cross-functional teams to design robust architectures, optimize performance, and improve fault tolerance across distributed systems.
- Participated in code reviews, documentation, and continuous improvement initiatives to maintain high-quality, production-grade software.

Armia Systems | Sr. Software Engineer

Kochi, India | May 2024 - May 2025

- Created reusable UI framework in Next.js for CMS application:* Developed a modular and scalable UI framework using Next.js, which significantly improved the efficiency and maintainability of the CMS application.
- Got exposure in LoopBack framework:* Gained hands-on experience with the LoopBack framework, building robust APIs and connecting them with various data sources, enhancing backend development skills.
- Worked with Spring Boot framework:* Engaged in beginner-level tasks with the Spring Boot framework, focusing on learning its features and capabilities for creating production-ready applications.
- Integrated third-party user tracking library in AngularJS application:* Successfully integrated a third-party user tracking library into an AngularJS application, enabling advanced user analytics and tracking functionalities.
- Debugged and fixed various bugs in both frontend and backend:* Actively participated in identifying, debugging, and resolving a wide range of issues in both frontend and backend components, ensuring the stability and performance of the applications.
- Got exposure in DynamoDB:* Learned the basics of DynamoDB, including its key features and functionalities.

Webcastle Technologies | Next.js Developer

Kochi, India | March 2023 - April 2024

- Developed and maintained frontend web applications using *Next.js*, *React.js*, and *Tailwind CSS*
- Created and integrated RESTful APIs using Node.js and Next.js app router
- Implemented parallel routing, authentication, and localization features using Next.js libraries such as *next-auth* and *next-i18next*
- Focused on creating ecommerce websites, CRM dashboards, and optimized websites for performance and SEO
- Collaborated with other developers and stakeholders using agile methodologies and best practices
- Utilized Next.js's automatic code splitting and hot module replacement features to enhance development efficiency and user experience

- Applied CSS-in-JS techniques to style components and manage CSS dependencies
- Demonstrated core competency in JavaScript and cross-platform compatibility
- Used version control tools such as Git and GitHub to manage code changes and collaborate with other developers
- Tested and debugged web applications using various tools and frameworks

Infosys | Technology Analyst

Bengaluru, India | November 2022 - March 2023

- Designed and developed admin dashboards using Angular, providing intuitive and efficient interfaces for system administrators
- Led the creation of a custom build workflow for the deploy pipeline, streamlining the development-to-deployment process
- Collaborated with cross-functional teams to understand project requirements and ensure seamless integration of admin dashboards
- Conducted training sessions to educate team members on Angular best practices and efficient workflow implementation
- Implemented robust error handling and debugging mechanisms, contributing to the overall stability of the deployed applications
- Worked closely with stakeholders to gather feedback and iteratively enhance the admin dashboard features based on user needs
- Played a key role in optimizing deployment processes, resulting in faster release cycles and improved project delivery timelines

Diksha Technologies | Senior Software Engineer

Bengaluru, India | June 2021 - November 2022

- Spearheaded the development of a cutting-edge payment application using React.js, delivering a secure and seamless user experience
- Conducted in-depth analysis of UX patterns in the existing application flow, identifying areas for improvement and optimization
- Implemented a highly optimized flow for the application, enhancing user interaction and overall satisfaction
- Leveraged React Lazy to efficiently load components, improving the application's performance and reducing initial page load times
- Integrated Tailwind CSS to streamline the styling process, ensuring a consistent and visually appealing user interface
- Collaborated closely with UX/UI designers to align the application's functionality with modern design principles
- Led code reviews and mentored junior developers, fostering a collaborative and knowledge-sharing environment
- Regularly engaged with stakeholders to gather feedback, incorporating user insights for continuous improvement
- Utilized various tools and frameworks such as Redux, Axios, Jest, and Enzyme to manage state, handle API requests, test, and debug the application
- Followed agile methodologies and best practices to deliver high-quality software solutions within deadlines and budget
- Stayed updated with the latest trends and technologies in the software development industry and applied them to enhance the application's features and performance

Brizotech Labs | Software Developer

- Designed and developed user-friendly and functional web applications using HTML, SCSS, and Angular framework
- Communicated with different clients and translated their needs into high-fidelity designs and prototypes using Adobe XD and Figma
- Tested and debugged web applications using various tools and frameworks, ensuring the quality and performance of the products
- Collaborated with other developers and stakeholders, using agile methodologies and version control tools
- Stayed updated with the latest trends and technologies in the web development industry and applied them to enhance the application's features and performance

SKILLS

Programming Languages:	Javascript, HTML, SCSS, CSS, Python, PHP, C, Node Js, Java
Libraries/Frameworks:	Next Js, React Js, Angular, Tailwind CSS, Bootstrap, Framer, Tanstack Query, Express Js, Loopback4
Tools / Platforms:	Figma, Adobe XD, Git, Builder.io, Codesandbox, Firebase, Jenkins, S3, SQS, SNS, SES, ECS, CI CD, Github Actions
Databases:	MongoDB, Firestore, SQL, DynamoDB

PROJECTS / OPEN-SOURCE

Ecommerce Website for a Leading Supermarket in UAE *Next Js, Node Js, Tailwind CSS, React Js*

- Developed a full-stack ecommerce website for a leading supermarket in UAE using Next.js, React Js, Tailwind CSS, and Mongo Db
- Created listing page and detail page for displaying products and categories, using Next.js app router and server-side rendering for SEO optimization
- Implemented authentication, loyalty program, and referral program features using Next-Auth, MongoDB, and custom logic
- Added animations and transitions to enhance the user interface and experience, using Framer motion and Tailwind CSS
- Integrated dynamic meta tags for each page, using Next.js head component and generateMetadata function
- Deployed the website to Nginx Server with pm2

Ecommerce Website for a Leading Eyewear Chain in UAE *Next Js, Node Js, MongoDB, React.js*

- Developed a full-stack ecommerce website for a leading eyewear chain in UAE using Next.js, React.js, and other technologies
- Implemented latest server-side actions from Next.js, such as data fetching, API routes, and middleware
- Added internationalization support using next-intl package, allowing users to switch between different languages
- Created custom authentication system using Next.js middleware and JWT, ensuring secure and seamless user login and registration
- Generated dynamic meta tags and open graph images for each page using next-generate-metadata, improving SEO and social media sharing
- Optimized images using Node.js and Sharp, reducing file size and improving loading speed
- Built custom analytics for products, tracking user behavior and preferences using MongoDB and Chart.js
- Managed Next.js cache using next-cache-manager, enhancing performance and reducing server load
- Deployed the website to a self-hosted server using a custom pipeline, using PM2, Nginx, and SSL

CMS Dashboard for a Leading Learning Application in Kerala *Angular, Node.js*

- Developed a CMS dashboard using Angular 16, allowing users to create and manage learning content
- Implemented custom directive using content editable, enabling users to edit content in place
- Used lazy loading components and above the fold loading techniques, improving the dashboard's performance and user experience
- Created custom route resolver for background data fetching, ensuring the data is ready before rendering the components
- Worked with standalone components, making the dashboard modular and reusable
- Used PrimeNG library for layouting, providing a consistent and responsive user interface
- Used RxJS for global state management, handling data streams and events efficiently

CERTIFICATIONS

- Angular Material - **Infosys**
- Javascript - **Infosys**
- Color Harmony 101 for Developers - **Infosys**
- Visual Harmony 101 for developers - **Infosys**

- Infosys Global Agile Developer Certification - Course - **Infosys**
- Micro Frontend - **Infosys**
- Scaling Agility at the enterprise - **Infosys**
- Building APIs with LoopBack - **Linkedin**
- MySQL Essential Training - **Linkedin**
